Cubetape Manager_3.01.17.0327_Setup.exe	Installable Manager version
CubetapePRO 3.01.20 Release Notes	Release Notes

RELEASE DATE: 13 February 2019 (PRODUCTION RELEASE)

CubeTape Firmware 3.01.20

New/Fixed/Changed:

- New: OLED startup and reset process adjusted pending next PCB version.
- New: Reset to factory defaults now uses the Measure button rather than the Up button to prevent accidental resets
- New: Reset to factory defaults now uses an “are you sure” prompt to prevent accidental resets
- Changed: “Display MC LFT” setting changed to “Display EU LFT”. Selecting this option allows display of the MI-008 certificate info without the seal broken function.

RELEASE DATE: 10 December 2018 (PRODUCTION RELEASE)

CubeTape Firmware 3.01.19

New/Fixed/Changed:

- New: Settings>Config>Set Time allows manual adjustment of RTC value
- New: Scan to Configure option allows custom Device ID to be output in place of the serial number
Scan to Configure Barcode format is Code 128 {G01/abcdefghijkl} with 12 characters max
- Fixed: Rare condition where USB batch upload terminated by BT interrupt
- Changed: Improved readability of number of records saved in batch mode
- Changed: RAVAS 3100 Indicator request string terminated with CR not CRLF
- Changed: Adjusted battery low thresholds to improve runtimes

RELEASE DATE: 24 April 2018 (PRODUCTION RELEASE)

CubeTape Firmware 3.01.18

New/Fixed/Changed:

- Fixed: Maximum length 300cm
