REACH Statement

The European Union (EU) has implemented regulation 1907/2006 REACH (Registration, Evaluation, Authorisation, and Restriction of Chemicals) effective from June 1, 2007. REACH for the most part applies to chemicals manufacturers, although downstream users of chemicals also have responsibilities.

Within the REACH framework, ParcelTools Pty Ltd is considered a Downstream User, and accordingly has no obligation to register chemical substances.

As a downstream user our responsibility is to communicate the information about Substances of Very High Concern (SVHC) along the supply chain. The list of SVHC can be found at:
http://echa.europa.eu/chem_data/candidate_list_table_en.asp.

We have analysed the list of substances after the latest additions on 17.12.2015. According to our current knowledge our product range including packaging materials does not contain substances listed on SVHC list or annexes. We will continue to monitor this and update the statement as required.

On behalf of ParcelTools Pty Ltd
