

## **C200 Firmware Update Instructions July 2023**

### **WARNING**

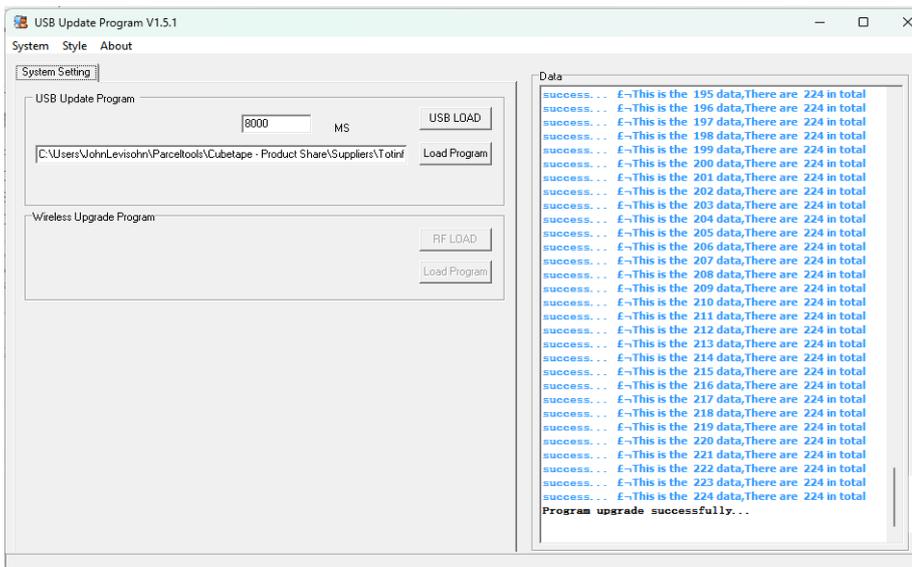

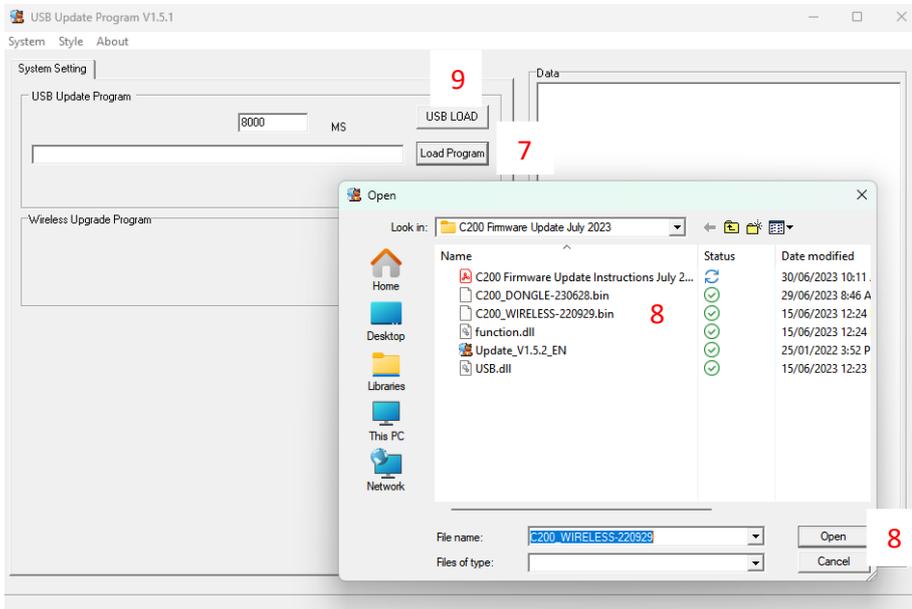

The process and tools described here can be used to update either:

- C200 wireless firmware or
- USB dongle firmware

Please take care to ensure the correct firmware file is loaded in the update tool before selecting USB Load, as it is possible to use the incorrect file and damage the connected unit (either C200 or dongle). This can be corrected but only after returning unit to the factory.

## Wireless Module Firmware Update Instructions

1. Remove any C200 or C200 USB RF Dongle from desktop USB port
2. Download Folder *C200 Firmware Update July 2023*
3. Open the upgrade tool: *Update\_V1.5.2\_EN*
4. Authorise the program to run in Windows
5. Connect C200 to PC USB port with USB type C Cable (LED will show red)
6. Power on C200 (LED will show red and blue)
7. Select *Load program*
8. Select and Open file *C200\_WIRELESS-220929.bin*
9. Select *USB Load*
10. Program will connect to C200 and upgrade wireless firmware
11. *Program upgrade successful* message on completion after 224 lines and ~20 seconds
12. Remove USB Cable and power on C200 normally

11

## USB Dongle Firmware Update Instructions

1. Remove any C200 or C200 USB RF Dongle from desktop USB port
2. Download Folder *C200 Firmware Update July 2023*
3. Open the upgrade tool: *Update\_V1.5.2\_EN*
4. Authorise the program to run in Windows
5. Plug in USB dongle
6. Select *Load program*
7. Select and Open file *C200\_DONGLE-230628.bin*
8. Select USB Load
9. Program will connect and upgrade USB Dongle firmware
10. *Program upgrade successful* message on completion after 125 lines and ~15 seconds
